*Wherever the art of Medicine
is loved, there is also
a love of Humanity*

Dear friends!

Every educational establishment, like a person, has its own biography. Ukrainian Medical Stomatological Academy was predestined to become the descendant of the first higher odontological school of Ukraine and during 100 years of its existence it earned the honorable status of the leading specialized higher educational establishment.

The large and creative teaching staff of the HSEE of Ukraine “Ukrainian Medical Stomatological Academy” is working on solving important problems of modern medicine and dentistry, introduction of innovative technologies of diagnostics, treatment and prevention of diseases; improving teaching methods and students’ knowledge control.

We strive to establish international cooperation. Favorable conditions for foreign students are being created. One of the priorities of HSEE of Ukraine “UMSA” is active integration with other scientific institutions and receiving international grants for our research work.

The life of the student community is full of exciting and creative cultural events, scientific research and active recreation.

So, the Academy is constantly developing, modernizing its infrastructure, enhancing its scientific achievements that have always been inherent to it. I look at those people, who work day and night to increase the glory of our Academy and I am sure, that great future is awaiting us!

*Best regards,
Rector of the Academy,
Honored Doctor of Ukraine,
Doctor of Medical Sciences,
Professor
V.M. Zhdan*

SYDOROVA
Alla Ivanivna

Dean of the Faculty
of Dentistry,
PhD in Medical Sciences,
Associate Professor

The Faculty of Dentistry is a leading center of dental education in Ukraine. It began its existence on September, 30, 1921, when the Faculty of Odontology of Kharkiv State Medical Academy was founded. In 1967 the period of its existence in Poltava began.

The main focus of the faculty is training highly competitive professionals for all educational levels. Graduates of the Faculty of Dentistry receive a state diploma certifying a higher education in the specialty "Dentistry".

After graduation our students continue to gain experience in the magistracy, postgraduate education and clinical residency. Some go for their internship to the educational institutions of Eastern and Western Europe and the USA.

The students' training is conducted at 38 departments of the Academy, 8 of them are the core ones and have the status of basic departments. 1317 students are enrolled in the faculty at the present time. 106 (8,05%) of them study at the expense of the State Budget.

The Faculty of Dentistry employs professional scientific and teaching staff, highly experienced in the field of scientific research, practical and educational work. The departments of the Faculty employ 431 educators, including 65 Doctors of Medical Sciences (15,08%) and 273 PhD (63,34%). All clinical departments are headed by Professors.

Starting from their third year of education, students of the Faculty can get practical experience in working with patients at the clinical departments of the Academy and train at the best medical institutions in Ukraine and abroad.

Material and technical base of the Faculty is constantly updated and enlarged. It allows making the learning process up-to-date and introducing the latest technological achievements into it.

The Faculty of Dentistry is the founder of international scientific conferences and nationwide competitions in dentistry. The students of the Faculty participate in cultural and educational activities of the Academy and amateur folk troupe.

Starting from 2005 the Faculty is headed by Alla Ivanivna Sydorova, PhD, associate professor of the Department of Propedeutics of Therapeutic Dentistry.

The wide variety of home countries of our students shows that the name of the Academy is well-known in Ukraine and abroad, because students from all regions of Ukraine and near and far abroad countries graduated and study at the Academy.

RYABUSHKO
Mykola Mykolayovych
Dean of Medical Faculty I,
PhD in Medical Sciences,
Associate Professor

The history of the Faculty of Medicine № 1 began in 1971, when the Faculty of General Medicine was founded at Poltava Medical Dental Institute.

The Faculty has 16 departments. Clinical departments of the Faculty are situated at regional and municipal hospitals of Poltava, which allows for high-quality practical training in the specialty «General Medicine».

Vocational educational program at the Faculty of Medicine № 1 is provided by 281 educators, including 53 Doctors of Medical Sciences, Professors and 117 PhD, associate professors.

Several scientific schools of pathological anatomy, experimental and clinical pharmacology, therapy, that provide the possibility to carry out research for Masters and postgraduate students, emerged and work successfully at the Faculty.

The system of computer-based education is implemented at the Faculty. One of the most prominent places belongs to the methodology of the educational process, implementation of the innovative pedagogical technologies.

Students actively participate in student scientific society, present their scientific achievements at international and national conferences, contests, competitions and seminars. They demonstrate their active civic stand and outstanding artistic talents and abilities in nationwide, regional, municipal and academic events.

The significant role in the organization of educational work belongs to the library of the Academy, which provides students with academic books, background and technical literature and introduces new forms of social and cultural work.

In 2008 Mykola Mykolayovych Ryabushko, PhD, Professor of the Department of Experimental and clinical Pharmacology with clinical immunology and allergology was appointed the Dean of the Faculty.

At the present time the Faculty of Medicine № 1 continues to set new targets, future challenges, namely to further increase the quality of education, improve material and technical base and to continue the glorious traditions of the Faculty.

POKHILKO
Valeriy Ivanovych

Dean of Medical Faculty II,
Doctor of Medical Sciences,
Professor

Based on the decision of State Accreditation Committee dated April, 24, 2007, the Academy earned the license to train specialists in specialty “Pediatrics”. In 2012, according to the decision of the Scientific Council of the Academy, the Faculty of Medicine of the Higher State Educational Establishment of Ukraine “Ukrainian Medical Stomatological Academy” was reorganized into two faculties: the Faculty of Medicine №1 and №2.

The founding of the faculty was driven by demographic characteristics of Ukraine and Poltava region and the shortage of pediatricians as the primary link of specialized neonatal care and children treatment.

The Faculty has 6 departments, which conduct training in physiology, pathology and intensive care, diseases of infants and adolescents, pediatric surgery and cardiology, pediatric infectious diseases, pediatric immunology and medical and social rehabilitation etc.

The staff of the Faculty continuously works on the textbooks, conducts clinical studies, go abroad for internships and apply for international grants to fund their scientific research.

The latest achievements of digital technology, teaching and students’ knowledge control, computer-based and distance learning are used during the educational and pedagogical process. One of the means of students’ knowledge quality control is the “Online gradebook”

The Faculty of Medicine №2 has all necessary social conditions for education, housing, health care and nutrition of the students. Students also have the opportunity to train in spacious gyms in their free time. In summer the academy has health and sports camp for 100 people.

The Dean of the Faculty is Valeriy Ivanovych Pokhilko, Doctor of Medical Sciences, Professor, Head of the Department of Pediatrics №1 with propaedeutics and neonatology, pediatric anesthesiologist-resuscitator of Poltava, the doctor of the highest category.

Over the short period of its existence the faculty created strong scientific and teaching staff, who aim to teach students to think clinically, to acquaint them with the particulars of diagnostics and treatment of childhood diseases to prepare them for their future profession.

BURYA
Lilya Volodymyrivna

Dean of the Faculty of
Foreign Students' Training,
PhD in Medical Sciences,
Associate Professor

The Foreign Students Training Faculty of HSEE of Ukraine "UMSA" started admitting foreign students in 1960, but till 1991 the Faculty trained them only in the specialty "Dentistry". Those foreign students were mostly from socialist countries.

In 1992 the Foreign Students Training Faculty was founded. It trains foreign students in the specialties "Dentistry", "General Medicine", "Nursing", "Orthopedic Dentistry", "Pharmacy".

To prepare foreign citizens for admission to the Academy and other educational establishments, the Preparation Division for foreign citizens was founded in 1997.

In 2004, as part of the implementation process of Bologna Convention and Ukraine's integration in the global space, the Academy started training foreign students in English in specialties "Dentistry" and "General Medicine."

After graduation foreign students receive diplomas of international standard.

Selection of highly qualified specialists who are constantly improving the educational process, implementing innovative technologies, providing students with a quality education is of great importance for training foreign citizens.

The staff of the Faculty did a great job of creating a new curriculum and textbooks for basic disciplines and adapting existing programs to the curriculum. Particular attention is paid to the acquisition of academic library funds of English literature.

The Academy helps the development of students' skills by involving them in sports sections, resulting in the participation of foreigners in the regional championships, where they repeatedly become winners. In addition, international students are actively involved in amateur art festivals taking place in the Academy, and are involved in the cultural events of the city and the region.

The Dean of the Faculty is Lilya Volodymyrivna Burya, associate professor of the Department of hygiene, environment and labor safety in the field, PhD.

MARCHENKO

Alla Volodymyrivna

Dean of the Faculty of
Postgraduate Education,
PhD in Medical Sciences,
Associate Professor

The Faculty of Postgraduate Education was created in 1993. It is a leading structural unit of the Academy on the final stage of medical professionals' training for practical public health.

The learning process is conducted at 7 departments of the Faculty of Postgraduate Education, 22 departments of the Faculty of Medicine and the Faculty of Dentistry. Postgraduate education in the Academy includes training medical specialists in 20 specialties in the internship training, magistracy, residency, advanced professional education and specialization courses, information and training courses.

Advanced training in pre-assessment and specialization cycles for medical professionals is conducted in 19 specialties.

The departments of postgraduate education of dentists, orthopedists, orthodontists departments are the supporting departments of the Ministry of Public Health of Ukraine for postgraduate education in the specialties "Dentistry", "Therapeutic dentistry", "Orthopedic dentistry" and "Orthodontics".

The priority of the faculty is preparing specialists for primary medical assistance and the implementation of national and state in the field of Public Health. In 2012 the employment division was created at the Faculty.

During its existence the faculty has significantly increased its staff, scientific, material and technical potential; created educational-practical centers, the quantity of specialties from different types of post-graduate training is constantly expanding.

Highly qualified staff of the Faculty implements the latest technologies of postgraduate education, up-to-date treatment methods and nanotechnologies; distance learning is also integrated actively.

The Dean of the Faculty is Alla Volodymyrivna Marchenko, PhD, associate professor of the Department of Therapeutic Dentistry.

KUNDIYY
Zhanna Petrivna

Principal of the Medical
College

The Medical College of the HSEE of Ukraine “Ukrainian Medical Stomatological Academy” has been training medical and pharmaceutical professionals in the specialties “Nursing”, “Orthopedic Dentistry”, “Pharmacy” for more than 20 years.

The learning process is provided by 8 cycle methodical committees, which include PhD, methodologists, educators of the first and the highest teaching categories.

To facilitate theoretical and practical training of students, the departments of the Academy, medical and pharmaceutical institutions of Poltava are actively involved into the teaching process. Training rooms for the occupation-oriented cycles are equipped with special mannequins and simulators.

In 2015 the Medical College was awarded the Gold medal in the nomination “Modern educational establishment as a socio-cultural center of civic and patriotic education of children and students” of the international exhibition “Contemporary Educational Establishments – 2015”, organized by the Ministry of Education of Ukraine and the National academy of Pedagogical Sciences.

The staff of the College devotes a lot of time to extracurricular work. Students participate in organizing and conducting art activities, competitions, festivals, exhibitions both on academic and regional level. Student government and student council actively develop at the college.

Over the years, the Medical College has produced some two thousand graduates, including college professors, managers in health care facilities, pharmacy managers and leading specialists.

In 2008 Zhanna Petrivna Kundiyy was appointed the Principal of the Medical College. She is working on strengthening the material-technical base and the formation of educational-methodical institution-building.

Powerful material and technical resources have been created to fully support the educational and scientific process, creative development and leisure activity of students and staff of HSEE of Ukraine "Ukrainian Medical Stomatological Academy".

They comprise 5 academic buildings, accommodating the Departments, lecture and laboratory rooms, computer labs and administrative premises. All of the lecture halls are equipped with multimedia equipment.

21 computer labs, connected to the Internet network and equipped with the appropriate software, are operating at the Academy for information support. All Departments are equipped with the state-of-the-art computers.

Clinical Departments of the Academy are located in all regional and municipal medical facilities of Poltava and equipped with the state-of-the-art diagnostic and medical equipment.

Publishing Division has been founded at the Academy to provide publication of educational-methodological and scientific papers.

Library with its total collection of more than 390 thousand copies and a developed structure of circulating libraries and reading rooms provides high-quality, efficient book and information services for students and academic staff.

The vivarium was founded to carry out the scientific research.

Modern student sports complex is functioning at the Academy, including Sports Complex (44Lutsenko Str.), Sports Game Center (23Shevchenko Str.), two sport grounds; Sports and Recreation Camp "Dykanska Dubrava" (Poltava reg., Dykanka district, the village of Mykhailivka).

Sports Complex of the Academy, located on the territory of the student campus, is a 5-storey building, comprising four gyms, chess-and-checkers club, methodological unit, showers, teachers' rooms and others. All premises are equipped with the appropriate sports equipment. So students and staff can do sports at the spacious gyms in their leisure time.

Sports and Recreation Camp "Dykanska Dubrava" is located in the picturesque village of Mykhailivka, Dykanka district, Poltava region, within the range of 33 kilometers from the Academy. The territory of the camp covers an area of approximately 1 hectare. The estimated capacity of the camp is 100 seats.

Students are served by canteen, three cafe-bars and a buffet. First-aid station is functioning effectively, providing with emergency medical care, preventive examinations and various medical manipulations, prescribed by a doctor.

Academy campus comprises four dormitories, providing with living conditions. The rooms are comfortably equipped; a laundry is available for students; household rooms with automatic washing machines are on each floor of the dormitories. Reading halls of the academic library are functioning at the Dormitories 2 and 4. On the territory of student campus there is a playground for the leisure activity for students and student families, as well as a sports ground.

The cultural and educational life at HSEE of Ukraine “Ukrainian Medical Stomatological Academy” is full of bright impressions, exciting projects, and creative activities. Academy students take an active part in social and artistic events, city-wide and national actions, and social projects. Profound knowledge, obtained on the lectures and workshops, give them an opportunity to adequately represent the Academy at scientific congresses, conferences, Olympiads and achieve significant results.

Various artistic amateur groups, four of which have been awarded the honorary title of the “Folk Amateur Group”, are functioning at the Academy to increase the general culture level and support the talented youth. Various clubs, including sports clubs, groups of interest, etc., are also running at the Academy. A great variety of contests have been organized, too. The joint participation of students and academic staff in socio-cultural activities has become successful. Such effective leisure time brings together and provides with a positive results.

Civil responsibility, pride for the national successes, pain for failures, social activity – such features are characteristics of the patriotism in Academy students, who are the active participants in the volunteer movement.

The initiative group of expert teachers and medical students on the basis of common interests create the best conditions for the conduct of charitable actions, providing the best opportunities for successful development and socialization of people (aid to vulnerable groups of children and young people, work with veterans, people with special needs, juvenile delinquents; holding of trainings, workshops); spreading of useful and important information, teaching participants practical skills, providing with first medical care and psychological assistance in military environment, introduction to the major pathologies of various systems of the body. Active collaboration contributes to medical students, supervised by the experienced physicians, to gain the invaluable experience in assistance to those who need it.

The Academy provides each individual with all necessary facilities for self-realization in active training, educational programs and educational work.

Higher State Educational Establishment of Ukraine “Ukrainian Medical Stomatological Academy” is the step to adult life, the incredible emotions and impressions, new acquaintances, the first achievements and victories!
